NOTICE OF ALLOWABILITY

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ping Wang on Friday, March 26, 2010.

The application has been amended as follows:

Claim 53 has been rewritten as follows:

- - 53. The polyolefin single or multi-layer film of Claim 50, wherein said core layer comprising comprises:
 - (i) a blend of PP homopolymer and PE homopolymer;
 - (ii) a blend of PP homopolymer and a PP/PE random copolymer;
 - (iii) a blend of PP homopolymer and a PP/PE block copolymer;
 - (iv) a blend of PP homopolymer and a PP/PE/PB terpolymer;
 - (v) a blend of a PP/PE random copolymer and a PP/PE block copolymer; or
 - (vi) a blend of PP with a saturated styrenic block copolymer. -

Claims 60 has been rewritten as follows:

- - 60. The polyolefin single or multi-layer film of Claim 50, wherein each of said E' and E" is substantially the same in the MD and TD.- -

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The closest prior art is Taniguichi (WO 99/62987) which teaches a biaxially oriented film comprising a blend of a polypropylenic component and a polyethylenic component (See Office action from 9/29/2009). However, Taniguichi fails to teach the film has a dynamic loss modulus (E"), measured at 3 Hz and 25°C, from about 28 MPa to about 136 MPa in the transverse direction (TD) and/or from about 73 MPa to about 135 MPa in the machine direction (MD), and a dynamic storage modulus (E'), measured at 3 Hz and 25°C, from about 630 MPa to about 2800 MPa in the TD and/or from about 1300 MPa to about 3000 MPa in the MD. Furthermore, the prior art fails to teach or render obvious such a biaxially oriented film comprising the claimed blend with the claimed combination of storage and loss modulus in the MD and TD directions.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to KEVIN R. KRUER whose telephone number is (571)272-1510. The examiner can normally be reached on Monday-Friday.
